SAP S/4 HANA implementation postponed from January 2026 to June 2026

Dear valued supplier,

After careful and comprehensive review and evaluation of the current progress of the ERP system conversion, we have decided to adjust the go-live date for the SAP implementation to use the additional time for optimizations and ensure a smooth start.

The new go-live date has been set for the beginning of June 2026.

This date adjustment is necessary to fulfill our responsibility as a reliable partner and to ensure a successful and stable transition. Our primary goal is to avoid potential risks in our business processes and be a reliable business partner to our supplier during the transition phase and beyond.

What does the go-live postponement mean for you?

The company decided to keep the business running as of today (without the ERP change). This is valid for all relevant locations Rosenberger Hochfrequenztechnik GmbH & Co. KG with the sites Fridolfing (RT) and Radeberg (RAD) as well for Rosenberger Magyarország Kft. (RoHu).

1. Remaining urgent deliveries can be processed until Thursday 18.12.2026, 12:00pm. In this case get in contact with your logistics / planning contact.
2. Deliveries from Friday 19.12.2025 – Sunday 04.01.2026 will not be processed.
3. As the commercial plant separation can only be concluded with the Go-Live in June, please address your invoices as it is today to Rosenberger Hochfrequenztechnik GmbH & Co. KG.
4. However we proceed with the physical plant separation and deliveries shall be delivered to the new allocated Rosenberger location, which has been addressed by the Strategic Purchaser beginning of December 2025 to you.
5. Material, which is in transit to RoHu and might have already RoHu as Invoice address, we ask you to change the invoice and address it to RT.

In Q1 2026, we will provide comprehensive details regarding the cut-over period & go-live in June 2026. If there are any questions, please contact your Strategic Purchaser.

We thank you for your understanding.

Best regards,
