Purpose of this Work Instruction

1 Purpose of this Work Instruction

This work instruction is mandatory for all suppliers who deliver products with technical cleanliness to Rosenberger company.

2 Description of Execution

Additional labeling of products of technical cleanliness

Mark each KLT or Carton with an additional label which includes the following information. Size of the label should be similar to the standard label and is applied next to this. In the case of reusable packaging, there is also a requirement that labels may only be applied with adhesive dots.

Example for the KLT / carton label

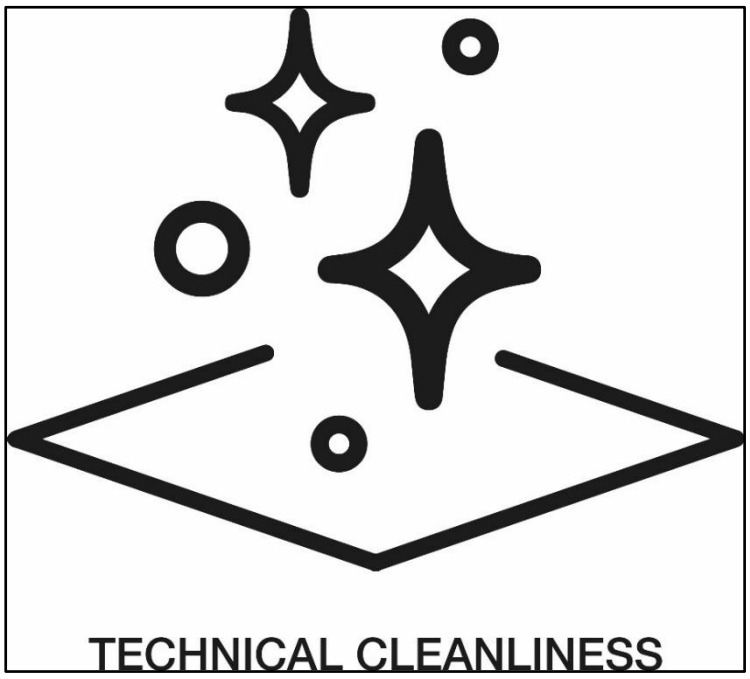

For users of the print version: In any case of doubt have a look at the current version of this document in the Rosenberger Document Matrix!

Mark the pallet clearly visible with the label. Size of the label approx. 210x148 mm.

The label must be clearly visible on the pallet to identify the technical clean products directly in our goods receipt.
